

35mm DIN Rail and Cutting Tool

- Standard 35mm profile, 1mm thick
- Easily cut using simple hand tool
- no need for pneumatic or electric cutting machines
- Rail is perforated for easy mounting in control cabinets
- Available in 1 metre lengths, steel or aluminum

35mm DIN rail does not need a lot of detailed explanation. However, Emphatec's offering is very unique in that it can be cut to length in the field very quickly and easily. All that is required is a simple hand tool. The resulting pieces do not have sharp edges and require no finishing. One metre lengths are available in steel or aluminum.

The steel rail is zinc galvanized while the aluminum is protected by an alumite film.
